Please Indicate: Program Certificate Concentration Track

Description of the change in the certificate, concentration or degree program:
Reduce total number of credits from 40 to 30 in the Assistive Technology Concentration. In reviewing other assistive technology programs throughout the country and looking at the current trend in GSE, it seemed most appropriate to keep the program competitive and alter the AT Masters to lower the total credits required to graduate. With this change, a full-time student would expect to complete the Masters’ program in 3 semesters and a part-time student, taking 6 credit hours a semester, could complete the program in 5 semesters. Course requirement changes will parallel the current trends in the assistive technology field and provide the means for including NCATE requirements. All program requirements are courses that address assistive technology as a whole, thus, more universal in nature.

Approval from other units:
Please list those units outside of your own who may be affected by these. Each of these units must approve this change prior to its being submitted to the Graduate Council for approval.
