In an effort to increase enrollment, streamline course offerings, and allow for better Performance Based Assessment (PBA) measures, the Instructional Design and Development (IDD) part time program faculty are requesting the modification of the total number of credits for the IDD part time program concentration from 39 to 30, and the modification of required versus elective courses as per attached (see second page of this document). To effectively support this concentration modification, we are also requesting a change in credits from fixed to variable for the following elective courses: EDIT 771, EDIT 772, and EDIT 573, and approval for 2 new courses, Instructional Design and Development (IDD) Portfolio, and Advanced Instructional Design and Development (IDD) Portfolio. These two new courses and the elective courses modifications will allow us to formalize PBA and will provide us with more flexibility in offering elective courses.

Approval from other units: NONE

Please list those units outside of your own who may be affected by these. Each of these units must approve this change prior to its being submitted to the Graduate Council for approval.
